Reference number: EEA/DIS/20/021

II.1.2) Main CPV code

72300000 Data services

II.1.3) Type of contract

Services

II.1.4) Short description:

The EEA, as leading contracting authority for the purpose of this inter-institutional call for tenders, seeks to establish a framework service contract with an experienced service provider who will assist it and the European Commission, Directorate-General for Environment (DG ENV) as participating contracting authority, by providing IT consultancy services in the areas of application development to support thematic data products.

II.1.6) Information about lots

This contract is divided into lots: no

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: 7 500 000.00 EUR

II.2) Description

II.2.3) Place of performance

NUTS code: DK011 Byen København

Main site or place of performance:

The services will be performed mainly at the contractor's own premises with occasional meetings at the EEA premises (1-3 per year depending on the requirements of the specific project).

II.2.4) Description of the procurement:

The EEA is responsible for developing, implementing and operating approximately one hundred spatial and tabular data flows in which Member States report data to the EEA. When data have been successfully delivered to the EEA, the data are processed in various steps and eventually disseminated for further use. Services required by DG ENV will be performed in close cooperation with EEA. EEA and DG ENV co-own the referred systems, though EEA is responsible for infrastructure and day-to-day operation. The dataflows and services implemented in EEA are highly automated, though continuous maintenance and support are required to ensure a smooth operation. Several software packages are used on premises. EEA operates around 100 dataflows on which member states are required to report environmental data and information. Dataflows are closely operated in cooperation with the EEA thematic experts and covers air, water, emission, climate, biodiversity etc. This inter-institutional call for tenders covers consultancy services to develop products which support the delivery of dataflows using webforms, or in the development of products and applications based on those dataflows. Expert support is needed to develop robust and automated IT solutions which can deliver maintainable products in a consistent manner on the EEA infrastructure.

II.2.5) Award criteria

Quality criterion - Name: Describe the process for developing a data driven mobile application that can run on Android and Apple mobile phones and tablets that includes geo spatial data. The user experience should still allow notifications and user positioning using a mobile device. / Weighting: 15

Quality criterion - Name: Describe the process of web form building for complex data driven applications using a desktop environment based on .NET Core framework. The output of the web form would be a single XML-file that can be downloaded as a file. These forms should include a level of validation and contain sub forms. / Weighting: 15

Quality criterion - Name: Describe the process of a big data integration containing multi thematic areas (water, land, climate, air, biodiversity). How would we prepare this data and make it user friendly to scientist for processing? / Weighting: 15

Quality criterion - Name: Describe a framework that could validate XML based datasets using XQuery using multiple external REST API sources as validation data. / Weighting: 15
