**Clarification No 1 for open call for tenders:**

**Framework service contract – Purchase of carbon offsets to compensate for the EEA's aviation and premises-related CO<sub>2</sub> emissions**

**Reference number: EEA/OSE/09/005**

**Question 1:**

Assuming that under the framework contract to be awarded the Agency would spend maximum 20 000 EUR per year (and thus maximum 80 000 EUR over the contract's entire duration) for credits concerning Golden Standard projects or equivalent and based on the market price of X per ton, could you please confirm that you expect to purchase approx. 20 000 divided by X credits per year?

**Answer 1:**

As already indicated in the Tender Specifications (see in particular Sections 2, first paragraph; and 3 thereof to which reference is made again), the contract shall be implemented, based on actual demand, through annual order forms (which alone shall bind the Agency) the maximum value of which is estimated at 80 000 EUR (20 000 EUR per year).
