Clarification No 1 for open call for tenders:

Framework contract for support to work at the science policy interface

Reference number: EEA/SKI/08/004

Question 1:

Having regard to award criteria B "Quality and relevance of the proposed approach to meet the tender objectives", do you expect the tenderers to present short descriptions of the approach and method they would apply for each of the activities mentioned or rather a more in-depth description of the approach and method that would be applied for a selected number of activities?

Furthermore, are there any conditions or preferences as to the format and length of the tenders?

Answer 1:

Unless otherwise specified, it is at every tenderer's discretion (taking into account, inter alia, the award criteria against which tenders will be evaluated) how it decides to present its tender.
