

Title: Environmental policy integration and coherence from a systems perspective

Reference: EEA/IAS/21/003

The EEA wishes to enter into a contract with a service provider to support the development of an EEA briefing on Environmental policy integration and coherence from a systems perspective. The service provider will be required to develop an analytical approach in collaboration with the EEA and apply it to European agriculture, marine affairs, fisheries and aquaculture and forestry sectors to get insights into how environmental targets and objectives are integrated within the policies and how these sectors are foreseen to contribute to achieving the environmental goals of the European Green Deal (EGD) and other strategic policy frameworks.

In a next step, sectoral activities will be put within the broader perspective of the food system given its reliance on the natural resource base and relevance to the EGD and selected long-term, strategic policy frameworks. This will also enable exploration of how such an approach could be applied to other systems such as mobility and energy.
