

E-PRTR DATA COMPLETENESS AND ERRORS

The European Pollutant Release and Transfer Register (E-PRTR) provides easy and transparent access to data reported by Competent Authorities of European Union Member States as well as Iceland, Liechtenstein, Norway, Serbia and Switzerland.

Data completeness

- Some data might not be imported in the E-PRTR register due to technical issues related to data format, confidentiality claims or delay in data collection, validation and compilation. This has an effect on the completeness of the EPRTR dataset. For those data, reporting countries have provided a list of facility's names which can be found below.

Correction rounds

- Every year, Reporting Countries have the possibility to resubmit data of previous reporting years in order to solve any technical issue, correct errors or complete the data previously submitted. A list of countries by year is provided in a table under the heading "**Additional information**"

Data omitted

- Countries

Germany

- E-PRTR 2007, Germany reported that the information related to 133 German facilities is not complete; the list of facilities not yet included in the register is available [here](#).
- E-PRTR 2008, Germany reported that the information related to 62 German facilities is not complete; the list of facilities not yet included in the register is available [here](#).
- E-PRTR 2009, Germany reported that the information related to 56 German facilities is not complete; the list of facilities not yet included in the register is available [here](#).
- E-PRTR 2010, Germany reported that the information related to 43 German facilities is not complete; the list of facilities not yet included in the register is available [here](#).
