Designated Areas
(National - CDDA)**

Version 9 - Quality control report

version 1 - October 2011

1 Introduction

The European inventory of nationally designated areas holds information about protected sites and about the national legislative instruments, which directly or indirectly create protected areas. The inventory began under the CORINE programme. It is now maintained for EEA by the European Topic Centre on Biological Diversity and is annually updated through a data request to Eionet countries. Data reported by other European countries are provided to EEA by Council of Europe and UNEP WCMC.

Quality control tests have been performed by EEA on the CDDA database provided in October 2011 by ETC/BD. This database is included in the EEA data service as version 9, and is publicly available at the following URL:

<http://dataservice.eea.europa.eu/dataservice/metadetails.asp?id=1111>

The report is organized as follows: Main statistics, contains comparison of records available in individual data tables for previous and current version of the database. It is followed by five chapters dedicated to tests results on individual data tables. One annex providing supplementary information is available at the end of the report.

You can navigate through the report by the bookmarks you can see on the left side of this PDF document.

More detailed and complex quality reports were prepared for each of countries participating on Eionet data collections in order to help them prepare their systems to generate future deliveries to EEA. The reports will be uploaded to new, country specific CDDA envelopes on CDR, together with prefilled data templates, at the start of the next data collection.

5.01 Number of records

Number of sites records by country including comparison with previous version. Number of new sites in database is subdivided to show number of older sites (designated before 2007) added to database for the first time this year and number of newly designated sites (designated in 2007 or later). Detailed information about number and size of the new sites subdivided by designation type is also provided.
