
Water stress indicator WEI for annual average on river basin level for the a) baseline, b) 2050 under 'economy comes first' scenario, and c) compared with urban population numbers

Withdrawals-to-availability ratio

- 0–0.2 (low water stress)
- 0.2–0.4 (mid water stress)
- > 0.4 (high water stress)
- No data
- Outside data coverage

Total population in cities, 2004

- < 100 000
- 100 000–250 000
- 250 000–500 000
- 500 000–1 000 000
- > 1 000 000
