A specific methodology for these activities has not been prepared because the contribution to total national emissions is thought to be currently insignificant, i.e. less than 1% of national emissions of any pollutant.

For general guidance please refer to chapter 060000 Solvent and Other Product Use - Introduction.

If you have information contrary to this please contact the expert panel leaders.

These activities are not believed to be a significant source of PM_{2,5} (as of December 2006).
