</table>

A specific methodology for these activities has not been prepared because the contribution to total national emissions is thought to be currently insignificant, i.e. less than 1% of national emissions of any pollutant.

If you have information contrary to this please contact the expert panel leaders.

These activities are not believed to be a significant source of PM$_{2.5}$ (as of December 2006)

Updated with particulate matter details by:

- Mike Woodfield
- AEA Technology
- UK
- December 2006
