**Danish Nature Agency klimatilpasning@nst.dk**

We encourage involving other stakeholders with whom you work in filling out this self-assessment (e.g. researchers, EPAs, NGOs).

- **but it will be possible to involve other stakeholders in the process up to the first draft report available in December 2013.**
- **Filled in by the National Nature Agency due to the short deadline and summer vacation**

#### Part I: General statements on adaptation

**1. In my country, in the past five years, the level of public awareness of the need for adaptation as a response to climate change has increased**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**2. In my country, the need for climate change adaptation has reached the national political agenda**

☒ strongly agree ☐ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**3. In my country, the following influences have triggered adaptation (Please select three most important triggers)**

☒ Extreme weather events

☒ Damage costs

☐ UNFCCC process

☐ EU policies

☐ Adaptation in neighbouring countries

☐ Scientific research

☐ Public pressure

☐ Lobbying from private sector

☒ Forerunner sectors

☐ Media coverage

**4. In my country, the willingness to develop policies and to take adaptation actions at national level is**

☒ very high ☐ high ☐ medium ☐ low ☐ very low ☐ don't know

**5. In my country, in the past five years, there has been an increase in the amount of adaptation-related knowledge (e.g. in relation to vulnerabilities, adaptation options) generated with the aim of informing policy making**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**6. In my country, uncertainties in future projections (e.g. uncertainties regarding climate change) are explicitly addressed in the adaptation policy process**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**7. In my country, adaptation objectives are based on an understanding of the impacts, risks and/or vulnerabilities to climate change**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**8. In my country, integration of adaptation into sectoral policies and programmes is increasing**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**Please provide examples:**

e.g. water sector, building and construction, infrastructure and spatial planning, rescue preparedness, see <http://en.klimatilpasning.dk/sectors.aspx>

**9. In my country, aspects that are relevant to climate change mitigation are taken into account in the adaptation policy process**

☐ strongly agree ☐ agree ☒ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**Please provide examples:**

e.g. district cooling off buildings: <http://en.klimatilpasning.dk/sectors/energy.aspx>

**10. In my country, transnational co-operation is considered as an element in our adaptation policy process**

☐ strongly agree ☒ agree ☐ neutral ☐ disagree ☐ strongly disagree ☐ don't know

**Please provide examples:**

The Wadden Sea strategy. please look at: <http://waddensea-forum.info/index.php/wsr-climate-atlas.html>

**11. In my country, the following barriers for adaptation have been identified (Please select the three most important barriers)**

- ☐ Lack of political commitment/will
- ☒ Unclear responsibilities
- ☒ Limited cooperation among stakeholders
- ☐ Lack of (financial, human) resources
- ☒ Uncertainties
- ☐ Lack of knowledge generation
- ☐ Lack of knowledge exchange
- ☒ Lack of data such as socio-economic, climate and other physical data
- ☐ Limited capacity in the policy, practitioner and/or research communities
- ☐ Conflicting values and interests
- ☐ No adequate adaptation options available
- ☒ Legal issues (e.g. conflicting legislations)

Please use the box below to provide any further comments and thoughts related to the questions above or any information that you wish to share with us (e.g. reports, references)

The government from 2011 has especially focused on limited cooperation, legal issues and lack of information and involvement, see newsletters e.g. at: <http://en.klimatilpasning.dk/recent/news/newsletter7.aspx>

## Part II: The adaptation policy process

### 12. In what stage of the adaptation policy process is your country in?

- ☐ Adaptation process has not started
- ☐ Agenda setting (i.e. adaptation is politically recognised as important)
- ☐ Formulation (i.e. responsible actors respond by formulating adaptation policies)
- ☐ Decision (i.e. policymakers have adopted an adaptation policy)
- ☒ Implementation (i.e. measures foreseen in the policy are being implemented)
- ☐ Monitoring and evaluation (i.e. review and updates of policy/actions)

## Prepare the ground for adaptation

**13. How would you assess the mechanism put in place at national level to coordinate the horizontal integration (i.e. integration into sectors) of the adaptation policy process?**

☐ very effective ☒ effective ☐ medium effective ☐ less effective ☐ not effective ☐ no mechanism in place ☐ don't know

**14. How would you assess the mechanism put in place at national level to coordinate the vertical integration (from national to local level) of the adaptation policy process?**

☒ very effective ☐ effective ☐ medium effective ☐ less effective ☐ not effective ☐ no mechanism in place ☐ don't know

**15. Please give a short description of the horizontal and vertical coordination of adaptation policy in your country. Please also indicate who has been involved and what mechanism for coordination has been used (please also indicate if these mechanisms have changed in the different stages of the process, e.g. from formulation to implementation).**

#### **Horizontal coordination**

A cross-ministerial committee of government officials has been responsible for mapping the impacts of climate in Denmark and the Action plan for a climate-proof Denmark. The action plan highlights 64 initiatives which contribute to a better framework for climate change adaptation effects by central and local government, private enterprises and individuals.

#### **Vertical coordination**

A National Task Force on Climate Change Adaptation has been established in the Ministry of the Environment. The government has decided that all 98 Danish municipalities should prepare actions plan for climate change adaptation by the end of 2013. New guidelines from the government describe how the municipalities can manage the task and reach the goal laid down in the action plan. A mobile team on climate change adaptation is established and offers guidance and facilitates collaboration between municipal authorities and other stakeholders e.g. in the field of preparation of the municipal climate change adaptation plans. A public information campaign has been launched aimed at helping citizens to think more about prevention and climate proofing of their homes. And finally the Danish Portal for Climate Change Adaptation presents knowledge about climate change and climate change adaption within relevant sector and presents a lot of relevant cases on implemented adaptation measures.

#### **What was crucial for successful coordination?**

It was crucial to commit all relevant ministries in a cross-ministerial committee of government officials and hereby to ensure coordination and collaboration on cross sectorial matters.

#### **What was challenging or missing?**

Mapping climate change – barriers and opportunities was the first step towards getting a common understanding and overview of the effects of climate changes. The next step on how to act, hereby also mainstreaming of climate adaptation in relevant programmes and politics, was (and is) challenged by different interests and legally binding agreements i.e. Natura 2000, the Water Framework Directive etc. at the national level.

### **Identify risks and explore options**

**16. Are risk assessments or vulnerability assessments available for your country?**

☒ yes ☐ currently under development ☐ not yet, but planned ☐ no ☐ don't know

**If yes: available at**

☒ national level ☒ sub-national level ☐ trans-national level

**Please provide references to relevant documents, also if available at sub-national or trans-national level (e.g. Länder, provinces, regions, communities, river-basin):**

**Please insert text and provide references to documents.**

As local risk assessment should be included as part of the municipal climate change adaptation plan and a priority of the local adaptation measures.

**18. In relation to the national assessment, how is/was the risk or vulnerability assessment process coordinated (e.g. who commissioned the work; who carried it out)? What methodological approach (e.g. literature review, modelling, expert appraisal) has been used? How have uncertainties been addressed?**

#### **Coordination**

Please look at section 15

### Methodological approach

Each sector ministry was responsible for own text

#### 19. In relation to the national assessment, have you identified the costs of climate change impacts and the costs and benefits of adaptation?

No, it was not part of the assessment, but a more general chapter on socio-economic climate change adaptation with two examples was included in the mapping.

#### 20. In relation to the national assessment, what kind of information is still needed for risk or vulnerability assessments? Please select the three most important issues:

- ☒ Uncertainty estimates
- ☐ Local/community level information
- ☒ Consideration of different time periods
- ☒ Estimates of costs
- ☐ Estimates of benefits
- ☐ Information on interdependencies across sectors
- ☐ Consideration of social issues

#### 21. In relation to the national assessment, do you plan to update the risk or vulnerability assessments?

- ☒ not planned   ☐ planned but work has not started   ☐ update of assessment has started   ☐ update already available   ☐ don't know

#### Are there requirements to do so on a regular basis? Please explain.

The government will continuously take stock of the progress of the initiatives in the action plan. Furthermore the municipal climate change adaptation plans will be evaluated in 2015.

#### 22. Have you identified and assessed adaptation options on the basis of risk or vulnerability assessments?

- ☒ yes   ☐ currently under development   ☐ not yet, but planned   ☐ no   ☐ don't know

If yes: available at

- ☒ national level
- ☐ sub-national level
- ☐ trans-national level
- ☐ sectoral level
- ☐ cross-sectoral level

**23. How have you identified and assessed adaptation options?**

- ☐ Expert judgement
- ☒ Participatory processes
- ☐ Cost and benefit assessment
- ☐ Multi-criteria analyses

**24. Please indicate the types of adaptation options identified:**

- ☒ Grey options (i.e. technological, such as river flood defence, beach nourishment)
- ☒ Green options (i.e. ecosystem-based approaches that use nature's multiple services, such as crop diversification, enhancing the ability of indigenous plant and animal species to move across landscapes)
- ☒ Soft options (i.e. managerial, legal and policy approaches, such as awareness-raising initiatives, passing legislation, creating early warning systems, insurance, planning instruments)
- ☒ Combined options
- ☒ green technology
- ☒ green technology, climate change adaption should contribute to transition to a green economy and thus create jobs now and in the future, [http://en.klimatilpasning.dk/media/590075/action\\_plan.pdf](http://en.klimatilpasning.dk/media/590075/action_plan.pdf) , see page 23

**25. Have you prioritised adaptation options?**

- ☒ yes ☐ currently under development ☐ not yet, but planned ☐ no ☐ don't know

**26. If you have prioritised adaptation options, which methodological approach (e.g. expert judgment, multi-criteria analysis) has been used?**

no answer

**27. Have the adaptation options been included in an action plan?**

Yes, section 15: [http://en.klimatilpasning.dk/media/590075/action\\_plan.pdf](http://en.klimatilpasning.dk/media/590075/action_plan.pdf)

**Upload documents. Select files from your computer - they will be uploaded when you click the Save button at the end of this page.**

**Implementation, monitoring and evaluation**

**28. Please provide a maximum of three examples of what you would consider as ‘good practices’ in adaptation that have already been put in place in your country. Please indicate why they are considered to be ‘good practice’?**

1. One way to consider “good practice” is to highlight other positive effects and find solutions on how climate adaptation can be combined with other interest (synergy to other sectors): 1. in the “Rabalder Park” a skateboard park is designed to assist the waste water utilities, <http://en.klimatilpasning.dk/recent/news/newsletter7.aspx>, 2. Another case “water is to bring Kokkedal together” demonstrate how local management of increasing amount of rainwater can go hand in hand with urban development and establishment of recreational value. 3. Biodiversity and nature conservation will also be improved (<http://en.klimatilpasning.dk/recent/cases/items/water-is-to-bring-kokkedal-together.aspx>), yet other cases shows how creation of wetlands and afforestation are designed to withstand a changing climate and at the same time have positive effects on the biodiversity and the outdoor life: (<http://en.klimatilpasning.dk/recent/cases/items/newforestsadaptedtofutureclimate.aspx>).

**29. What are your plans for integrating new information and insights into existing adaptation policies?**

See section 21

30. In my country, monitoring, reporting and evaluating schemes for adaptation policies are ...

**Monitoring**

☐ not planned ☒ planned ☐ under development ☐ currently being implemented

**Reporting**

☐ not planned ☒ planned ☐ under development ☐ currently being implemented

**Evaluation**

☐ not planned ☒ planned ☐ under development ☐ currently being implemented

**In case you have selected "Under development" or "Currently being implemented", please provide additional information and upload related documents.**

no answer

Upload documents. Select files from your computer - they will be uploaded when you click the Save button at the end of this page.

**Part III: Level of adaptation and policy instruments in sectors**

**31. Please highlight the relevant sectors/areas in your country and assess the current state of adaptation at various levels:**

Please score the state of adaptation using the following scale:

**Selected Value Meaning**

**0** = adaptation is not relevant for my country

**1** = need for adaptation not recognised and no measures implemented yet

**2** = coordination activities for adaptation started

**3** = some adaptation measures identified for the sector but not yet implemented

**4** = portfolio of adaptation measures identified and implementation (of some) launched

**5** = portfolio of adaptation measures implemented

**6** = portfolio of adaptation measures in place and monitored/evaluated

Use the arrows or the keyboard to input digits from 0 to 6.

**32. Are you using policy instruments (see question 33 below for examples) for implementing adaptation actions?**

☒ yes
 ☐ under development
 ☐ no
 ☐ don't know

**33. If you are already using instruments for implementing adaptation, what are the main instruments in the different sectors in your country?**

Sectors / Instruments	Agriculture	Forestry	Bio diversity	Human health	Water	Marine fisheries	Coastal areas	Mountain areas	Tourism	Transport	Energy	Built environment	Spatial planning	Disaster risk reduction	Civil protection	Industry	Business services	Financial insurance	Cultural heritage

34. If (additional) instruments for implementation are planned in your country, what are the main instruments you are considering?

The Ministry of Environment supports the development of green technologies including new climate adaptation solutions. In 2012 more than 30 water- and climate adaptation projects was supported as part of for the development of new technologies. In 2013 we have even more funds for green technology. In 2013 more than DKK 130 million are given to green technologies and include partnerships and innovative Danish companies that can provide exports and green jobs to Denmark.

35. What are the most important financing mechanisms currently in place (or the mechanisms that will be considered in the future) for implementing adaptation in the sectors you have identified as relevant in your country?

36. In your country, how do you address transboundary issues? Which instruments facilitate your work (e.g. EU Regional Policy, EU Interreg projects, biogeographical regions and regional adaptation strategies)?

Both on the local, national and EU level

37. In your country, how do you coordinate adaptation activities across regions or municipalities? Which instruments facilitate your work (e.g. River Basin Management Plans, flood risks mapping, spatial planning taking account of the diversity of territories)?

One region is very actively coordinates adaptation activities among the municipalities.

#### Part IV: Involvement of stakeholders

38. Have you involved stakeholders in the adaptation policy process?

☐ No ☒ Yes

39. If yes, how would you assess the general contribution of stakeholders/actors engagement in the adaptation policy process?

☒ very important ☐ important ☐ neutral ☐ less important ☐ not important

40. The three tables below allow you to identify the stakeholders involved and the format of their involvement for the development (1st table), implementation (2nd table) and monitoring and evaluation (3rd table) phases of the adaptation process.

Level of involvement:

<b>Information given</b>	information has been provided to stakeholders (e.g. web-sites, newsletter, reports, informative meetings)
<b>Information gathered</b>	information has been collected from stakeholders (e.g. online-survey)
<b>Consultation</b>	feedback on policy draft proposals has been obtained from stakeholders (e.g. written feedback on policy drafts)
<b>Active involvement</b>	stakeholders have actively been involved in, and have had the possibility to shape decision-making in the adaptation policy (e.g. advisory committees)
<b>Partnerships</b>	decision-making power is redistributed through negotiation between responsible authority and stakeholders
<b>Empowerment</b>	final decision is in the hands of the stakeholders

From the national perspective, what has been the involvement of stakeholders in the development phase of the adaptation policy process?
