Notes:

¹ For Cyprus, the figures cover/concern only the areas of the Republic of Cyprus in which the Government of the Republic of Cyprus exercises effective control.

² For Finland, in some sites all land or water areas do not belong to the network because of the exceptional digitization method. The actual total area in Finland according to the Natura 2000 database is 50.398 km².

³ In the Netherlands, a number of SCI's and SPA's have been regrouped, without losing their identity as SPA's or SCI's. As a result the total number of Natura 2000 sites in the Netherlands is now 162.
