

INNOVATIONS IN EVALUATION – STRATEGIES FOR TRANSITION GOVERNANCE

EEEN Edinburgh
23-24 Nov 2017

Session outline

- **Initial reflections**, 10 min (Lisa Eriksson, Swedish EPA)
- **Evaluating transitions**, 25 min (Sofie Sandin, IIIEE)
- **Integrating transition theory into evaluation designs**, 25 min (Per Mickwitz, SYKE)
- **Discussion**, about 30 min

Initial reflections

Lock-in mechanisms

But where are the obstacles?

Let's scrutinize this from the aspects of:

- Transportation
- Food
- Buildings

Me

Work

There are solutions!

City

Potential for transitions!

Conclusions – key elements

	Transport	Food	Building
	Question of time	Question of time	Question of time
	Solutions	No coordination	Solutions
	Potential	Potential	Potential

There seems to be potential for societal transitions.
On the societal level – how can we make more progress – what can we learn from evaluation?

Discussion

Questions

- What experiences and perspectives would you like to share? Experience from evaluations that focused on transition? Are there good examples? Reflections on our perspectives?
- *Spend a few minutes with your neighbour to find out!*
- *What did you discuss?*

From the rapporteur to the plenary in the closing session

- What is the current state of play of evaluation supporting this theme?
- What are the key analytical and take-up obstacles for environmental evaluation in this context?
- What are opportunities and priority areas for developing evaluation in the current political context?
