

Marine LitterWatch guide for participants

1. Download the Marine LitterWatch app at home and log in to your community using the code provided by the community. Make sure you are familiar with the marine litter items list in the app survey before going to the beach.

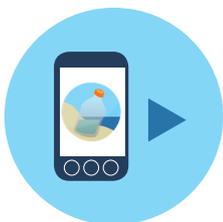

2. Show up at the beach on the event day and follow the instructions of the organizer. You will be split in teams where one will register the litter items in the app, while the others collect it into bags.

3. Start a survey on the app to register the litter you'll find in the area pre-defined by the organizer.

4. Collect the litter while shouting out the type of litter you find. Make sure the team member with the app is registering the items in the survey.

5. Submit the team data with the app by using the event code provided by the organizer. You can do this at the beach or later at home. Remember you have 28 days for this! You'll get a green 😊 in your survey list once the data is sent.

Thank you for helping to tackle marine litter with us!
